“ Made the best homemade crabcakes in the world! They were fresh too, I know cause, I help Mark catch em out of an ole fishing boat with snorkel and net at the Cape the morning they were baked. Rest in peace.

“ That must have been a special request-which she would do cuz she loved you and your family.

She made a lot of deep fried clam cakes, made from scratch and hand mixed on a 4 ft. Countertop (cottage kitchen was soooo small). She had an old family recipe and after her guest's first taste, they were smitten- and then always requested by loved ones over and over (when there were fresh clams).

She did boil up the crabs that were caught, and then we'd put put down a newspaper table cloth over the outside picnic table (secured with SOMETHING cuz it was always windy) for the freshly caught crab feast but frankly, don't remember the crab cakes event.

Thanks

Mitchell what a great memory to share!
